Student Name: Sudharshiya Ganesan

USER RESEARCH

A. The Goal of this Document

The main goal of this document is to create a User-Centric and Interactive travel website which provides clear multi- Itinerary plans for the Users to help them to have a stress-free holiday. I also add a calendar along with the Itinerary plans which list the local events, festivals and activities. It may also help them to plan their trips during special occasions.

I study about different travellers and their choice in my User research and design the website based on the requirements. I concentrate on the tourists and locals who want to explore and enjoy the holidays. The website should contain the travel insurance and advice regarding the weather updates & driving rules.

B. Business requirements for the client

TravelNZ provides New Zealand tourism services for travellers from around the world. The company assign me to create a professional and a well-designed UI. After thorough discussions, TravelNZ decide to have at least three pages: Home, Tour and Contact. As a UI/UX designer, I must complete a user research report and create wireframes and prototypes for each page.

C. Task1:

User Research

This section will provide the user research I have done for the TravelNZ website using this process.

1. Gather Design Requirements

- **Clear and Intuitive Navigation:** By keeping the main menus simple with options like Homepage, Tour and Contact & by keeping the icons of company logo, Homepage, Tour, Contact and User log-in at the top of the Website(Consistent location) in all 3 pages, a clear navigation is enabled among these pages.
- **Search bar:** By providing a Search bar in the homepage, I help the users to search by Destinations, flights and their travel choices.
- **Interactive website:** By Providing Chat-bot assistant in the homepage, I help the users to easily get travel plans and suggestions from our customer service team and to guide them when they need something.

The study about the User's behaviours and their searches in the internet, helps to suggest them a good set of destinations, accommodations and Itinerary plan.

- **Social media integration:**

1. Allow the users to share their travel photos, videos and their experience in social media platform.
 2. Make the customers to join in a community to see previous customers' recommendations.
 3. Monitor their comments and review them.
- **Map integration:** Map is integrated with the website to enable users to check the duration for their travel journey, to explore their point of interest and make decisions before booking, It also helps them to guide when they are on the way to destinations and can make in to the events and activities or not.
 - **Retain customers:**
 1. Ensuring the details in the websites are up-to-date and providing clear and appealing content about the destinations, tour choices and transport options.
 2. Providing travel deals to the customers
 3. Providing discounts for the repeated customers.
 4. Reviewing honest feedbacks from the customers and make changes to the website accordingly
 5. Providing additional services like travel insurance, travel tips and advice.
 6. Monitor User behaviour.
 7. Sending Travel alerts.
 - **Weather updates:** Display the weather warnings and precautions to be made before they start the journey. Examples: Driving precautions in the frosty roads, rough sea updates for those travelling in cruises. It gives them an idea to decide to buy motion sickness bracelet or any other precautionary steps.
 - **Calendar:** The calendar should provide the list of local events, activities and occasions. It guides the tourists to attend the local festivals if they are around the locations. Examples: Waikato Air-Balloons festivals, Otaki Kite festival, Wairarapa balloon festival.
 - **Itinerary plan:**
 1. Enabling the date and time selection in the calendar to select their tour of their choices and interests.
 2. Enabling modifications with the Itinerary plan by adding or removing the activities and events in the lists.
 3. Displaying the total duration of the tour.
 4. Options to download the Itinerary plan to access it offline.
 5. Maintaining Privacy of the customers' Itinerary plan.
 - **Choices of tour:** We have different choices for the users to select from:
 1. Adventure lovers
 2. Trekking and Hiking.
 3. Overnight cruises, scenic flights options in the Transport Icons.
 4. Sightseeing places and tourist attractions lists
 5. Hidden gems which only locals know will be added in the website
 - **No hidden charges:** The Itinerary plan should contain details of number of days and price of the total tour with no hidden or additional charges. It creates the trust and reliability among Users
 - **Customer Feedback:** Analyse the customers' pain points and add features in the websites according.

- **Safety and Security information:**
 1. Sending travel and driving alerts and restrictions on a worse weather day.
 2. Providing the services like Travel insurance
 3. Collaboration with reliable accommodation and Transport Rental agents
 4. Providing emergency contact number in the contact page in case of unexpected circumstances and it helps the tourists.
 5. Log-in account to protect the user's privacy and it is password protected.

2. User Interview Questions

- What are the factors you consider when you plan for a trip?
- What are the options you look for in a Tour?
- What are the occasions you usually plan for a trip?
- How important and feasible if the weather warnings and travel tips are in the travel website rather than making a separate google search?
- Do you have any difficulty in finding specific type of tour?
- What are the adventures you like to do?
- What are your favourite activities when you go for a trip?
- How are your feedbacks for a website acknowledged as far?
- How long the waiting time of the customer care call for a travel company last?
- What is the best time you like to visit and why?
- Do you like a travellers' community in a social media and why?
- Do you prefer a cheaper budget travel website or a reliable travel website?
- Do you prefer virtual chat-bot or customer care toll free number?
- Do you like to explore the city or stay in a good resort during holiday?
- What are the difficulties you face when you explore a city?
- What are the fun factors you look for in a activity/event?

3. User Personas

- Used Hubspot for persona creations

Sherley Mathew

Job Title

Developer

Age

25 to 34 years

Highest Level of Education

Bachelor's degree (e.g. B.S.)

Social Networks

Preferred Method of Communication

Email

Goals or Objectives

To have a frequent holiday and to get along with family members and be stress-free from routine life. Plans holiday on kids' birthdays, wedding anniversaries and New year day.

Job Responsibilities

Smart worker

Biggest Challenges

Booking various events based on their priority online in different websites is difficult

Reports to

Madavan kumaresan

Job Title

Chef

Age

18 to 24 years

Highest Level of Education

Master's degree (e.g. M.A.)

Social Networks

Preferred Method of Communication

- Email

Goals or Objectives

To do a budget friendly world tour and try to find the hidden gems of the country and vlog it in his youtube channel

Job Responsibilities

Satisfying customers' taste buds

Biggest Challenges

- Collaboration & Creativity

Ivan Young

Job Title

Bus Operator

Age

55 to 64 years

Highest Level of Education

High school degree or equiv.

Social Networks

Preferred Method of Communication

- Phone
- Text Messaging
- Face-To-face

Goals or Objectives

Save money and use it for a family trip. Have a lovely family time with grandchildren and children.

Biggest Challenges

- Resources and guidance to identify a family friendly place

Job Responsibilities

Public service

4. Customer Journey Map (CJM)

<https://www.figma.com/file/gXapjwSM7Nd9YPOdpz57vx/CJM-TRAVELNZ?type=whiteboard&node-id=0%3A1&t=Hc5wYbWkUU8yTRAg-1>

5. Competitive Analysis

1. Flight centre:

- It has a good market presence.
- It provide various deals and unique offers.
- Encourage customer reviews and feedback.
- Local insights and personalisation
- Expert customer service

2. Airbnb:

- Different options of resorts with filter options
- Search by country and destinations
- Cheaper options to best options
- Mobile friendly
- Can contact the host easily.

6. Problem Statements

6.1 Home page: To prioritise the information and services. It should have only needed icons. Services like travel insurance, social media integration and chat-bot are displayed. Travel Reviews was a challenge

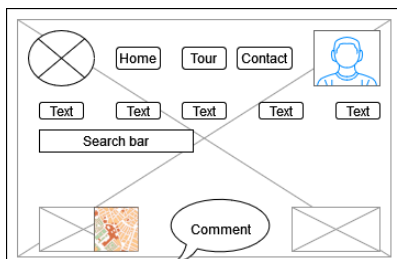

6.2 Tour page: Have an organised travel website with top attractions on the Page and others in icons with an itinerary plan and a calendar to make changes by the users of their choices.

6.3 Contact page: Proper details for Emergency and non-emergency contact. Customer care details are provided

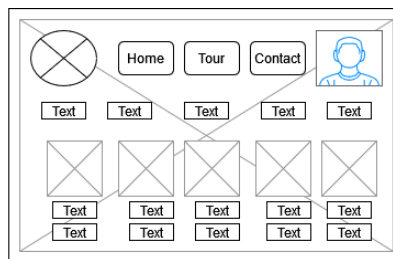

Task 2: WIREFRAME

https://whitecliffecollege-my.sharepoint.com/:u:/r/personal/20232004_mywhitecliffe_com/Documents/travel.drawio?csf=1&web=1&e=dau0R0

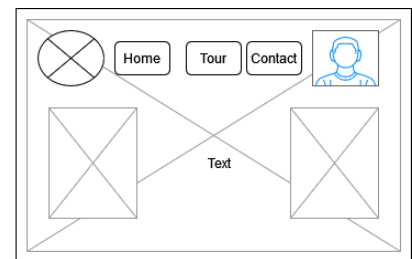

a. Homepage

b. Tour

c. Contact

Task 3: Digital prototype

<https://www.figma.com/file/Z22i3mtzFjfrv4ARX9Fnp6/Travel-NZ?type=design&node-id=0%3A1&mode=design&t=lrOh7zqzHb3wYYLI-1>

I have used Surface pro8 frame size for Prototype.

1. Homepage: Navigation to other pages
2. Tour: Horizontal navigation of images and navigating to other pages
3. Contact: Navigation to other pages

References:

1. 100% pure New Zealand and Kayak website
2. Used Tools like Adobe Express(logo), Hubspot, draw.io and Figma
